Common Sense

About City Directory Circulation

The true value of advertising circulation is *circulation consulted.*

To be exact by actual survey in twenty-four average American cities by actual count each city directory averaged three and one-half consultations for each business day.

To be conservative we will eliminate the sixty Sundays and Holidays when no tests were made.

For every thousand directories sold there will be an average of three and one-half daily consultations for each book for *three hundred and five days*, therefore—

$$1000 \times 3\frac{1}{2} \times 305 =$$

INDEX TO ADVERTISERS

[illegible]

"What You Should Know About Your City"

"The helpful kind of patriotism is the kind that grows out of a knowledge of one's town, of her growth, her people, her property, her government, and her needs. This knowledge develops, first, an intelligent interest; then, a sympathy, then, a reasonable affection, a wise and temperate jealousy for her good name and a wish that she may prosper and grow more beautiful; and finally, a desire to help her to become greater and finer, a bright and clean workshop and a home for the best of men and women." John Cotton Dana.

"Organized Effort on Behalf of Our City"

"The conception of Chamber activities is embodied in one of the adopted slogans 'Organized Effort on Behalf of Our City'—and the Chamber is a success only to the degree that this effort is extended and service rendered impartially, fearlessly, and unselfishly for the benefit of the community. The Chamber has made great strides in further developing the comprehensive character of the organization, which today is more generally recognized as an organized body through which all citizens may work for the advancement of the civic and commercial welfare of the city. It is non-political and non-sectarian. It voices the opinion of a membership composed of all shades of thought and of all kinds of commercial and professional activity. It is the voluntary, collective contribution of public-spirited men and women to the common good."

About City Directory Circulation

The true value of advertising circulation is *circulation consulted*.

To be exact by actual survey in twenty-four average American cities by actual count each city directory averaged three and one-half consultations for each business day.

To be conservative we will eliminate the sixty Sundays and Holidays when no tests were made.

For every thousand directories sold there will be an average of three and one-half daily consultations for each book for *three hundred and five days*, therefore—

THE NEWARK EVENING NEWS is the preferred newspaper in Metropolitan Newark, its suburban and northern New Jersey towns. Its readers prefer it as their channel of contact with the commercial, social and political world. More

90% of them have it delivered right to their home. Such a high percentage of home delivered circulation is unusual and offers concrete proof of an exceptionally strong reader interest resulting in a dominant influence on the purchasing power of the great Newark and North Jersey market. One simple but potent factor is responsible.

THE NEWARK EVENING NEWS is a mighty good newspaper.

Newark Evening News

Here are Facts

About the German Market in Newark

NEWARK, a city of 500,000 people has a German population of over 85,000

These German people are thrifty, industrious and are among our most substantial foreign citizens. They adapt themselves more quickly to things that are American and are therefore more susceptible to the appeal of the modern advertising of the up-to-the minute product.

A home-loving people, we find that 73% of our readers own the houses in which they live; 57% have radios, pianos and musical instruments, 58% have automobiles, and over 78% have some sort of electrical household equipment or appliance in their homes.

They are buyers of quality and will heed a standard

trade-marked product rather than follow an appeal for price.

The Freie Zeitung has been going to these homes for the past seventy-four years. The oldest continuously published newspaper in Newark, it is an institution among its readers and has been handed down three successive generations.

Alive and progressive, the paper has recently erected a new and larger building and plant; national photographic news services; correspondents in the principal cities and publishes with the timeliness of any English printed daily.

Its circulation, principally in Newark, Essex County, New Jersey, more effectively reaches these 85,000 readers than any other medium.

The difference between GOOD PRINTING and POOR PRINTING is a matter of great importance to you. Poor printing is uninviting, and the eye shrinks from it. It produces a feeling of involuntary resistance, and engenders an unresponsive state of mind.

• Good printing (like pleasant associates) is inviting, and appeals to the reader. Good Printing speaks distinctively, and influences one favorably.

• We have always concentrated our efforts upon the production of Good Printing, knowing it to be the more productive of profitable returns.

Common Sense

About City Directory Circulation

The true value of advertising circulation is *circulation consulted*.

To be exact by actual survey in twenty-four average American cities by actual count each city directory averaged three and one-half consultations for each business day.

To be conservative we will eliminate the sixty Sundays and Holidays when no tests were made.

For every thousand directories sold there will be an average of three and one-half daily consultations for each book for *three hundred and five days*, therefore—

NEWARK NUMERICAL DIRECTORY

EXPLANATORY NOTES

The streets are arranged alphabetically with their descriptions, each description followed by a numerical arrangement of householders, places of business and street intersections. (Arranged by rotation where no numbers have been assigned.)

The abbreviation t between the street number and the name signifies "rear"

The word "vacant" after a number signifies that the house, store or office at that number was vacant when canvass was made.

*Denotes householders and places of business having telephones.

"(Right odd)" after street description indicates odd numbers on right side of street.
